

PROJECT ENGINEER / MANAGER

This is an exciting opportunity to join the market leader in the wireless Internet broadband industry. We are seeking highly motivated and talented individuals for these roles in project management and engineering. The company that you will be joining is young and dynamic and we are going places.

This role would suit a qualified Engineer with a bachelor degree from a reputable university and many years of experience in the industry.

As a project manager, you will be involved in:

- Preparing and implementing the project schedule.
- Site acquisition and negotiations.
- Negotiating with contractors and building managers or owners.
- Management of assigned staff.
- Management and development of key contractors.
- Approving of payment claims.
- Site Inspection.
- Report writing and presentation.

A key component to the success of this role is managing the team workload. The ability to negotiate with contractors, building managers or owners is an important skill. Other skills such as communications, organizational and presentation skills are a necessity. As you are heading a team and liaising with contractors and the public, you will have people management skills and be a team player. We pride ourselves on our ability to deliver quality work in a timely manner and within budget.

If you are the person we are looking for, we will offer a very competitive remuneration package and a fantastic environment to develop your career.
